Locating Specific Articles

If there is a specific article that you are looking for, and you know the title:

1. Go to the MDC Libraries catalog page

2. Click on “Advanced Library Search”

3. Type the article title in the search box and select “Title” from the “Keyword” drop-down menu

4. If you have additional information for the article, such as the author name, you may enter that in the additional search box(es).

5. Select “Articles” from the “Material Type” drop-down menu and then click on the “Search” button.

6. The catalog will search through the databases to see if it is available through MDC. Click on the “Read Article” link to open, and log in if prompted to do so.
