Locating Specific Journals

If you want to see if the MDC databases have articles from a specific journal:

1. Go to the MDC Libraries page
2. Click on the “A-Z Journals” link
3. Enter the title (or some of the words contained in the title if you are not exactly sure) into the search box and click on “Go”
4. The journal search will return a list of journals containing your search terms that are contained in the MDC databases.
5. Click on your desired journal title link to go to the database containing the journal. (Some journals appear in more than one database but with differing date ranges; select the database that corresponds to the date range you are interested in.)

**Source:** Journal of research in reading [0141-0423]

- **Full Text Online** Academic Search Complete (EBSCO)
  Available from 1997
  Most recent 1 year(s) not available

- **Full Text Online** Wiley Online Library 2016 Full Collection
  Available from 1997 volume: 20 issue:1
6. You will be prompted to log in with your borrower ID and PIN/Password if you have not already done so

Once you have selected the journal title, and logged in, you have the option to “Search within this publication” for a topic.

Or, if there is a specific year or year/issue number you are seeking, you can expand the year links on the right to locate an issue or browse through multiple issues

(You may find that some journals only list the article titles for each issue. If the “Find Text” button does not lead you to the full article, contact a librarian for assistance)
